

# EX-560/575/570 SERIES

POS Retail System  
POS Hospitality System

The EX-560/575/570 series are mid-range cash registers complete with a high-brightness LCD and choice of printers/keyboards. The on-board features and functions compete with high range products. Various options and expandable connectivity are available for system enhancement.

A newly designed cabinet gives an advanced and unique appearance. The choice of printers (dot matrix, 1 sheet thermal or 2 sheet thermal printer), keyboards (flat or stroke keyboard) and drawers (with or without drawer) make the EX series versatile for all markets and applications.

The EX series offer two types of software - 03 type for hospitality and 05 type for retail. Features of the 03 type include Table Management, Clerk Interrupt, grouped PLUs (Look Up PLU), Split Bill, Floating Track/Clerk in IRC network, etc. 05 type enables standard 2026 PLUs, max. 56076 PLUs (option), 300 discount tables (Mix & Match), Bottle Return, Vendor/Store coupon, etc. Still more, both types offer Customer File, iButton, and electronic journal data (ESF) as options.

All models have a scrolling function on the bright and wide viewing angle LCD. A choice of enlarged or multiple item display facilitates fast and accurate operation.

## Major features of 03 type

### Table Management System

allows each separate transaction to be stored temporarily and picked up for additional orders. Split Bill function expedites table operations.

### Clerk Interrupt System

Different operators can use ECR for a sales transaction while other sales transactions are underway on the same ECR. Each operator's registrations are stored under that particular operator so when they log on again they are able to resume their transaction.

### Look Up PLUs

a range of categorized PLUs can be called up by a "Look Up PLU" key.

### ESF (Electronic Store & Forward, option)

Transactions and operations made on the ECR are recorded in memory and printed out.

### PLU/Group Sales per Clerk

Easy to find which operator sold a pre-selected list of 20 products the most. With this feature, each clerk is motivated to sell more of those products.

## Major features of 05 type

### 300 Quantity Discount Tables

of "fixed special price", "amount discount" or "percent discount" for bucket sales with certain quantity of one kind or different kinds of items, "free offer" when purchase exceeds certain quantity, "discount amount" / "purchase quantity" limitation per customer.

### User Friendly PLU Programming

allows you to create a new PLU file when you scan a new item, utilizing an existing PLU data - copy all the data, such as price, group, PLU flags, etc. automatically from the master PLU.

### Store/Vendor Coupon

Discount by Store and Vendor Coupon is available.

### Customer File

with an optional memory board, up to 1024 customers' TEL #, VAT #, name, address can be recorded.

Very convenient when issuing bills, especially for delivery service and frequent customers who require the bill with their name and VAT # printed.

Choice of dot matrix or drop in thermal printer.
